DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, 14-23, 27-35, 60-67, 73-79, 80-83, and 86-88, drawn to storing a digital audible signal or distinctive ring in the memory of the destination of the user communication device, classified in class 455, subclass 567.
 - II. Claims 11-13, 24-26, 36-58, 68-72, and 84-85, drawn to downloading and transmitting information from one communication device to the other, classified in class 455, subclass 466.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the invention I is concerned with the ANI, caller ID, and distinctive ring are store in memory of the user communication device. The subcombination has separate utility such as the invention II in which is concerned a method for providing multiple telephone with transferring data and downloading data from one telephone to other.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
